Relationships after Szumik (1996, 1997).

Containing group: [Neoptera](#)

## Introduction

Oligocene to Recent, with controversial records from the Lower Permian.

embios -lively

## Characteristics

- foretarsus modified with silk glands
- live in silken tubes
- wings very flexible; with blood sinus in radius (RBS)
- wingless females
- highly asymmetrical male genitalia

In addition, web spinners exhibit brood care.
